*Painless and Non-invasive Implantation Technology*

- PDRN
- Stem Cell
- Hyaluronic Acid
- EGF Oligopeptide-1

## *Stem Cell MicroNeedling System*

*EGF Oil Scrub Essence*

As we age, our metabolism slows down, and the skin's regenerative ability declines, leading to dull and lackluster skin that loses its baby-like smoothness and elasticity. The **sMTS Stem Cell MicroNeedle System Treatment** involves a skin cell rejuvenation technique. It utilizes a **painless** and **non-invasive implantation method** to open microchannels in the skin,

allowing direct penetration of ingredients such as **stem cells**, **PDRN**, **hyaluronic acid**, and **MS-EGF** into the deeper layers of the skin. This replenishes skin moisture, enhances skin regeneration capabilities, and maintains cell health, resulting in excellent wrinkle reduction, radiant skin, and the regaining of a smooth and youthful baby-like skin texture.

## sMTS Product Features

### Painless and Non-invasive Treatment

**Micro-spicules patented technology** enables painless and non-invasive opening of skin channels, allowing various active ingredients entrapped to penetrate deep into the skin. Suitable for individuals who are afraid of pain yet desire beauty.

### Focus on anti-wrinkle, restore firmness and elasticity

By utilizing **epidermal growth factors** and **adenosine** components, it effectively accelerates cell turnover and stimulates cell regeneration, leading to anti-wrinkle and fine line reduction effects.

### Combat free radical damage, prevent aging

Environmental factors such as ultraviolet rays and air pollution stimulate the formation of free radicals in the body, damaging the skin's texture and causing oxidation reactions. **Vitamin C** and **E** act as antioxidants for the skin.

### Stimulate collagen production

**PDRN** is a key ingredient in the sMTS MicroNeedling treatment, rapidly inducing tissue regeneration, shortening cell regeneration and wound healing time and stimulating collagen production.

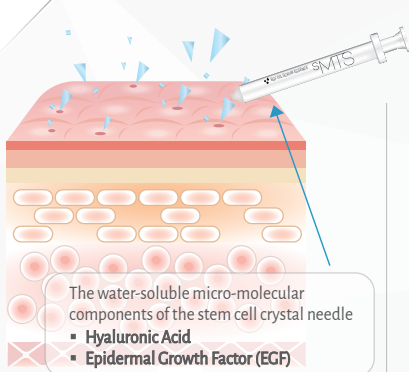

### Replenish skin moisture

By utilizing **micro-spicules patented technology** to open the skin pathways, large and small molecules such as **hyaluronic acid**, vitamin E, are delivered to the deep skin cells. This helps maintain moisture balance and makes the skin plump and elastic.

*Suitable for all skin types*  
Including dry skin, lines and wrinkles, elasticity-deficient skin, sensitive skin and damaged skin.

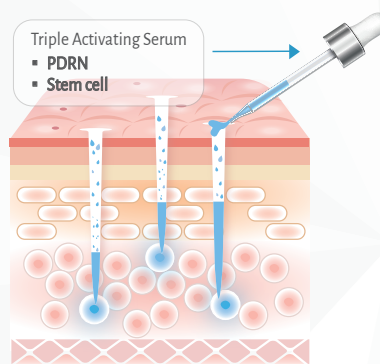

## Patented Technology

Micro-molecular Substances  
(Water-soluble Spicules)

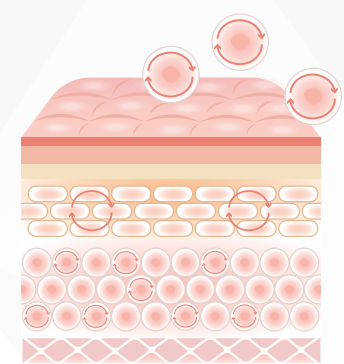

### Step 1 | Open

The unique micro-spicules patented technology can **painlessly** and **non-invasively** open the skin pathways.

### Step 2 | Delivery

By opening the skin channels, it allows micro-spicules and various active ingredients to **penetrate the stratum corneum** and be delivered to the deep skin cells.

### Step 3 | Revitalization, Regeneration

The essence penetrates the skin, **activates and regenerates** both the surface and deep layer cells of the skin, maintains cellular regeneration and circulation, and restores baby-like skin texture.

# Product Description

Beauty salon treatments only

## EGF Oil Scrub Essence

1g x 10ea/ box

- Deep Hydration
- Skin Rejuvenation

### Active Ingredients

#### MS - EGF

Anti-aging, repairing damaged skin, accelerating cell metabolism, and promoting skin regeneration.

#### Large Molecular Hyaluronic Acid

It locks in moisture, reducing water loss and making the skin smooth and hydrated.

#### Small Molecular Hyaluronic Acid

It can quickly penetrate the skin, reaching the dermis for deep hydration, increasing skin elasticity, and delaying skin aging.

#### Vitamin C

Antioxidant, inhibits and blocks tyrosinase activity, contributing to skin brightening.

#### Vitamin E

Antioxidant and moisturizing, delaying the formation of photoaging.

#### Olive Oil

Offers antioxidant properties, forming a protective layer for the skin.

## Triple Activating Serum

50 ml

### Cell Activation and Regenerative Catalyst

- Dual-function serum that can be used to dissolve the HA Micro-Spicules found in the Essence that penetrate the deeper layers
- Regenerate skin cells
- High-efficiency whitening
- Improve skin tone and the appearance of wrinkle

### Active Ingredients

- Anti-aging: Stem cells, Adenosine
- Skin cell regeneration: PDRN
- Whitening and Anti-inflammatory: Vitamin B3
- Hydration: Small-molecule hyaluronic acid, Rose Flower Water, Algae Extract, Glycerin.

Home Care Product

## Moisturizing Foaming Cleanser (150ml)

- Intense Hydration
- Soothing
- Cleansing
- Anti-inflammatory

- Gentle and mild foaming cleanser
- Effectively removes impurities from the skin
- Contains moisturizing hyaluronic acid, Vitamin E
- Contains antioxidant: Vitamin E
- Contains Anti-inflammatory: Centella asiatica extract, Allantoin

## Dual HA: Mask Pack Plus (1 sheet-25ml / pack, 5 packs / box)

- One sheet mask, One bottle of serum
- Extraordinary moisturizing, contains **24 moisturizing ingredients**
- Calms redness and soothes the skin
- Contains **16 types of amino acids**

## sMTS Dual HA Sun Block SPF44 PA++ (60g)

- Effective skin protection against sun damage
- SPF 44, PA++
- Contains Hyaluronate, Vitamin E, Shea Butter
- Provide protection from photoaging and premature ageing

## Dual HA : Serum Ampoule 25ml

- Penetrate the skin, continuously moisturize.
- Reduce melanin production
- Improve dehydration, dullness, fine lines
- Benefit in eliminating inflammation of acne-prone skin
- Soothe skin swelling issues

# START

## the skin regeneration treatment steps

Can be used with the following treatments:

HIFU Laser Peeling MTS RF  
Needle sponge extract  
Needle mesotherapy  
Mesotherapy

### ① Cleansing

sMTS Moisturizing Foaming Cleanser | Apply for 5 minutes.

Foam up sMTS Moisturizing Foaming Cleanser, using 10ml of cleanser and 20ml of water. Apply it to the face for 5 minutes and then thoroughly rinse.

### ② Implantation

sMTS EGF Oil Scrub Essence | Massage for 3 minutes.

Squeeze a small amount of sMTS EGF Oil Scrub Essence and apply it evenly on the face, including the forehead, cheeks, around the eyes, and chin. Gently spread it and use your fingertips to lightly massage in circular motions, allowing the Micro-Spicules to penetrate deeply into the skin.

### ③ Release

sMTS Triple Activating Serum | Massage for 10 - 20 minutes.

Pump out sMTS Triple Activating Serum, one pump each time, for a total of more than 9 pumps to cover the entire face. Apply to the forehead, cheeks, chin, and around the eyes. Experience a brightening and refining effect during the application process.

### ④ Moisturizing

sMTS Dual HA: Mask Pack Plus | Apply for 20 minutes.

First, apply the sMTS Dual HA:Mask Pack Plus, then cover it with plastic wrap to enhance absorption. Leave it on for about 20 minutes to fully hydrate the skin.

### ⑤ Protection

sMTS Dual HA Sun Block SPF44 PA++

Apply a layer of sMTS Dual HA Sun Block SPF44 PA++ to lock in moisture and protect your skin.

## Absorption Effect

Apply the sMTS water-soluble micro-spicules.

Add the sMTS Triple Activating Serum

Rapidly dissolve micro-spicules

Efficiently absorbed by the skin

## Treatment Effect

BEFORE AFTER

Instantly improve dull skin tone and increase skin elasticity

BEFORE AFTER

Soothe sensitive skin, effectively stop itching and reduce redness

BEFORE AFTER

Quickly tighten pores
